any ordinary external exposure to fire, as is soundarity proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tin, sinc, copper, or from roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square feet; it being far cheaper than any itool of the old style, and we are sure it will give better satisfaction.

It will also be found to be the best traing ever invented to It will also be found to be the heat using ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scattles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect addessor to any ob-ject to which it is applied. Tin Boofs can be painted over (and warranted not to leak) at two d llars and fifty cents per hundred square feet, which is cheaper and much betper hundred square isci, which is cheaper and much best tear than paint. This stooding will be found to be the best thoug for covering large Ruofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Ruilcoad Cara, Bridges, Depots, Station Nouses, Steamhout Decks, and, in fact, every kind of Roof where there is an external exposure from fire. An the Roof is perfect, without a joint

it, it presents no chance for fire to communicate, and any light substance will burn out althout igniting.

Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure buildings with Roofs covered with this Cement, at the same rates as for thosecovered with Iron, Copper or Tin The Cement will be furnished to those at a distance with directions for using with directions for using,

Having made considerable inquiry as to the merits of the
'Patent Elastic Cement Roofing," introduced into this city by Childs & Co., I find it to be highly recommended in this city by many excellent induses that it is meeting with

ready and general introduction; that its superiority over the tar composition Roofing is decided and freely admitte and finally, I expect to adopt it for my next roof, which will be next summer—having intended to use tin, but will try the virtues of the 'Patent Elastic Roofing' as a substitute. This is a purely vegetable compound, prapared on strictly scientific principles, after the manner of the celebrated Holland Professor, Boerhave. Because of its great success in most of the European Status, its introduction into the United States was intended more especially for those of our fatherland scattered here and there over the face of this mightly country. Mesting with great success arting them, I now offer it to the American public, knowing that its truly wonderful unedicinal virtues must be acknowledged. It is particularly recommended to those persons whose constitutions soay have been impulsed by the continuous use of ardent spirits, or other forms of dissipation. Generally instantaneous in effect, it finds its way directly to the scat of life, thrilling and quickening every nerve, raising up the drooping spirit, and, in fact, infusing new health and vigor in the system.
